WORK EXPERIENCE

CRED Bangalore, KA

Jun 2025 – Present

Product Operations — Growth & Campaigns

- **Onboarding Revamp (9M Users):** Reduced onboarding drop-offs by 15% across NTU users driven by user interviews that surfaced mid-journey friction, informing a full end-to-end flow redesign executed in collaboration with engineering and design teams.
- **Campaign Strategy & Transactional Growth:** Designed and shipped 20+ category-specific campaigns across utility bills, rent, and education verticals, achieved +11.3% user activation and +9.6% reactivation (Oct 2024–Jan 2025 vs. Apr–Ju 2025 baseline), with a +16.3% lift in Single-LOB to Multi-LOB conversions via strategic budget reinvestment.
- **Burn Efficiency & Unit Economics:** Cut monthly campaign burn by ~45% (₹2.7 Cr → ₹1.5 Cr) by identifying and removing penny cashback subsidies for low-risk user segments, sustained activation growth while materially improving campaign unit economics.
- **Structural Fixes & Campaign Hygiene:** Identified and resolved long-standing structural leaks inflating campaign costs: fixed cashback oversell across BBPS surfaces (Jan '26) and eliminated legacy issues including multi-campaign tagging errors and incorrect BBPS campaign assignments (Oct '25) reducing reward leakage and improving cost accuracy.
- **A/B Experimentation & Analytics:** Designed and executed A/B tests on reward structures and onboarding flows, tracked conversion funnels and user segmentation via Mixpanel and Databricks, using findings to reallocate budget toward highest-performing cohorts.
- **Rule Engine & Decision Logic:** Built DTree (decision-tree) logic and configured rule-engine workflows for fraud-resistant reward allocation, ensuring zero policy violations across 20+ live campaigns.
- **Cross-Sell Slab Automation:** Identified a recurring daily ops bottleneck where 30–50 Jira tickets required manual slab_id lookups across 1,500+ cross-sell reward slabs, consuming 1–2 hrs each morning. Built a scheduled automation (6:30 AM daily) that queries Databricks to extract slab_ids from active merchant campaign configs, auto-populates the correct Jira fields, and syncs live slab data to business tracking sheets — eliminating manual intervention entirely and saving ~1–2 hrs of ops effort per day.
- **AI Campaign Automation:** Co-built an LLM-powered internal tool translating business requirements into JSON campaign configurations reduced config time by ~75% (60 min → 25 min).
- **AI Debugging Assistant:** Built a conversational AI agent for campaign diagnostics with SQL-backed real-time data retrieval — cut escalation resolution time by ~80% (2–3 hrs → 30 min), eliminating recurring L1 support.

MACTORES Remote

Mar 2025 – Jun 2025

Cloud & Data Analytics Intern

- Supported end-to-end data analytics workflows on Databricks for cloud-based production systems.
- gained hands-on experience with AWS and GCP data integration pipelines in enterprise environments.

CYNUX ERA Remote

Sept 2024 – Mar 2025

Founder Office - Product Developer

- **EdTech Platform Development:** Designed and built a comprehensive EdTech platform from the ground up, implementing secure authentication, a student management portal, and an LMS for recorded lectures.
- **Security & Access Control:** Implemented TOTP-based login to ensure secure login and restrict unauthorized access, developed an exam portal with malicious activity detection features.
- **University Launch & Live CTF:** Led product launch at Dayanand Sagar University alongside a live CTF competition; built a real-time leaderboard ensuring fair, transparent judging and live score tracking.

SIDDHI VINAYAK ENTERPRISE Surat, GJ

Nov 2020 – Jan 2022

Customer Operations & Marketing

- Managed customer queries and served as liaison between customers and production teams.
- Built and maintained brand relationships with key partners such as Vishal Prints, strengthening vendor and stakeholder communication.
- Onboarded new manufacturers to expand market presence, focusing on quality product sourcing and supplier alignment.
- Maintained sales and inventory records, generating reports that supported management decision-making.

SKILLS

AI Systems: LLM Workflow Design (Claude), Prompt Engineering, Conversational AI Agents, Campaign Automation & Debugging Systems

Analytic: SQL, Rule Engines (Decision Trees), A/B Testing & Funnel Optimization, Product Analytics (Mixpanel, Databricks), User Segmentation

Product Execution: Campaign Strategy, SOP & Process Design, Cross-Functional Collaboration (Eng, Design, Ops), Experiment Design & Impact Measurement, Agile/Scrum, Sprint Planning

Technical Foundations: AWS, RETOOL, App Script, Jira, GitHub, Docker, Grafana, Postman

EDUCATION

Master of Computer Applications (MCA)	2023 – 2025
Jain Deemed-to-be University, Bangalore	72%
Bachelor of Computer Applications (BCA)	2020 – 2023
Bhagwan Mahavir University, Surat	82%

CERTIFICATIONS & ACHIEVEMENTS

Certifications: Azure Fundamentals: Microsoft | GitHub Foundations: Microsoft

Research: Authored a research paper on cloud-based systems [read here](#)
